India reports 46,951 new cases

With 212 fatalities due to COVID-19 in 24 hours, death toll touches 1,59,967

SPECIAL CORRESPONDENT
NEW DELHI

India on Monday reported 46,951 new COVID-19 cases – highest single-day jump since November 7 last year – and an addition of over 3,000 new COVID-19 cases as compared to Sunday, according to data released by the Health Ministry.

The continued surge over the past week has seen a jump of over 60% in new cases.

In the 24 hours to 8 a.m. on Monday, 212 deaths were recorded, the highest since January 9 when 228 deaths were reported in a single day.

India currently has a total caseload of 1,16,46,081, total recoveries of 1,11,51,468 cases and active case load of 3,34,646. The country's cumulative death toll stands at 1,59,967 currently.

registered in the 24 hours, 84.49% are reported from six States – Maharashtra, Punjab, Kerala, Karnataka, Gujarat and Madhya Pradesh.

Maharashtra has reported the highest daily new cases at 30,535 (65.03%). This is

followed by Punjab with 2,644 while Kerala reported 1,875 new cases. According to the Ministry eight States – Maharashtra, Tamil Nadu, Punjab, Madhya Pradesh, Delhi, Gujarat, Karnataka and Haryana – are displaying an upward trajectory in

the daily cases.

India's total active caseload has reached 3,34,646 and the present active caseload now stands at 2.87% of the country's total positive cases. Eight States/UTs – Maharashtra, Chandigarh, Punjab, Puducherry, Goa, Madhya Pradesh, Gujarat and Haryana – have a weekly positivity rate more than the national average of 3.7%. India's cumulative recoveries stand at 1,11,51,468 with 21,180 recoveries registered in the last 24 hours.

Of the 212 deaths, six states account for 85.85%. Maharashtra saw the maximum casualties (99). Punjab follows with 44 daily deaths and Kerala reported 13 deaths. The case fatality rate stands at 1.37% and is continuously declining from 1.75% last September. Fourteen States/UTs have not reported any deaths in 24 hours.
